Subject: Oak Ridge Project

STOP !
When are we going to learn that nuclear weapons are not the solution to any conceivable problem.
\$4 billion (estimated, of course) to create a facility to build more bombs is an obscenity.
We don't need the bombs. We don't need the waste products of their manufacture. We don't need the expense of decommissioning them at the end of their allegedly useful lives.
I know it is unlikely that this project can be derailed at this point, but please know that there are growing numbers of people who are sickened at the waste of time, money, energy and talent such projects represent.

Comment No. 1

Issue Code: 16

DOE is responsible for meeting the current requirements set forth by the President and Congress in the Nuclear Weapons Stockpile Memorandum, which is updated annually. The need for nuclear weapons and alternative uses of the Nation's funds are beyond the scope of the Y-12 SWEIS.
